

Whatever your fencing needs, our ready-to-install fencing panels provide you with flexibility of choice and easy, trouble free installation. To help decide how much ready-to-install fencing you'll require, we've prepared a user friendly calculation guide:

HOW TO ORDER

To calculate how many LINEAR panels and posts are required:

- 1 Take the number of metres required, and round up to the nearest even number. ie. 81 becomes 82 metres.
- 2 Divide 82 by 2 = 41 panels required.
- 3 Posts. Take 41, and add 1 post to finish off the run = 42 posts.
- 4 Select the type of post: Bolt Down (Art 3603BP12) or Concrete-In (3603CP12).
Fixings, to join panels to posts, are included.
- 5 Decide if you want to use support feet in the installation = 41 x 3603KIT4.
Fixings are included, to secure the feet to horizontal rail.
- 6 Count the number of corners and add the same number of 3603KIT2 to the order.
- 7 You are now ready for installation!
